Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

1-248. Claims 1-7, drawn to a genetically engineered mammalian cell containing an manipulated polynucleotide sequence inserted into a gene of the cell, where the gene is selected from SEQ ID Nos. 1-248, classified in 435, subclass 325⁺.

249-496. Claim 8, drawn to a method for generating antibodies against a human protein using genetically engineered mouse having genetically engineered mutation in a murine gene identifiable as corresponding to any one of SEQ ID Nos. 1-248, classified in class 800, subclass 6.

Applicant is advised that this is a restriction, not an election of species.

Each of inventions 1-248 and 249-496 are drawn to cells or methods of generating antibodies comprising mutually exclusive and independent nucleic acid sequences as each of SEQ ID Nos. 1-248 is structurally unrelated. No sequence is required for any other sequence. Further, the cells of invention 1-248 and methods of 249-496 are distinct because the cells and the methods are capable of separate uses. The cells of inventions 1-248 can be used to isolate mutated genes, and the methods of inventions 249-496 can be used in the production of antibodies.

As indicated above, applicant is required to elect one group for restriction practice. Should applicant choose to do so, any sequences fully embedded in the elected sequence will also be examined. Applicant is required to identify any such embedded sequences and there cannot be any overlap with other sequences not in the elected sequence.

Because these inventions are distinct for the reasons given, because of their recognized divergent subject matter, and the search required for any sequence is not required for remaining sequences, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
